PROFILE

MSc Computer Science graduate with 2+ years at Syntax building CI/CD automation, infrastructure-as-code and internal full-stack tooling. I work where DevOps, web application development and practical AI integration meet — automating the parts of a project that shouldn't need a human.

EXPERIENCE

Syntax Systems

01/2024 — Present · Košice

Junior Developer, DevOps team 06/2026 — Present

Junior DevOps Application Developer 01/2024 — 05/2026, working student

CI/CD	Built GitLab pipelines for automated builds, deployments and MS Teams / internal-API notifications.
IaC	Developed and tested Ansible automation workflows and SaltStack configuration management.
Product	Team member on an internal Metadata Management app for automated VM provisioning — Vue.js, Golang, MongoDB, Docker, Kubernetes.
Integration	Wired AWX, ServiceNow, HashiCorp Vault, vCenter and SaltStack APIs into internal web apps; Azure AD authentication.
GenAI	Shipped a GenAI agent that resolves code-review threads on GitLab merge requests.
Monitoring	Grafana dashboards plus custom Python monitoring scripts.
